Manufacturing Units

We have taken following precautionary measures to ensure dust free environment and to avoid contamination of the primary products.

All windows are kept closed to prevent dust from entering the area. The outside flooring has been paved with cement to minimize dust and mud from coming into the production area. All material is stored on pallets.

SOP's are prepared for all the processes that are carried out in the unit.

SOP's are displayed where ever required. Gujarati version are also displayed along with English version for easy reference of the workers.

All units are installed with

- ▶ Door closers
- ▶ Insect killers
- ▶ Close Circuit Cameras.
- ▶ A cabin for rejected material is installed for storing rejects.
- ▶ Pest control is done alternate Sunday. Special comprehensive pest control is done every five months.
